

Consultation Pack
Early Help Strategy

How to use the consultation pack and where to record

When using this consultation pack, please bear in mind that these are tools to help with the online survey.

We would like the results to match up to the online survey questions. When recording could you please put the answers directly into the online survey, and this feedback will be analysed alongside other feedback we have gathered virtually.

You will need to print this consultation pack off and do the work directly with young people and families, as you may need to reword questions or give context around the question as individual to the family.

We advise that you have the online survey open whilst facilitating this consultation with your families, as a guide to go off.

The survey link will be sent out to you alongside this pack.

Who can help me?

If I am feeling unhappy, at school, at home or outside. Who can I go to for help?

How do I feel about asking for help?

What would stop me from asking for help?

What would help me to ask for help?

What is working and what isn't working?
